

WHY IT'S WORTH IT

More than a straight smile.

Straightening your teeth is not only about how they look.

Easier to keep clean

Straighter teeth are easier to brush and floss.

Less wear and tear

Teeth in better positions are less likely to chip or wear unevenly.

Ready for future dental work

Active Aligners can make space for crowns, veneers or implants.

Confidence in everyday life

Many people feel more at ease talking, laughing and smiling with others, in person and on camera.

ACTIVE ALIGNERS *Teen*

Being a teenager is busy enough.

Clear, comfortable and removable, so straightening your smile fits around school, friends, sport and every photo along the way.

Good for busy families too: with no brackets or wires to adjust, most people need fewer check-up visits than with fixed braces.

WE ARE A PROUD
ACTIVE ALIGNERS *Provider*

Simply Straighter Teeth.

ACTIVE ALIGNERS

FOR ADULTS AND TEENS

Straight teeth, without braces.

Active Aligners are clear, removable aligners, custom-made for your teeth.

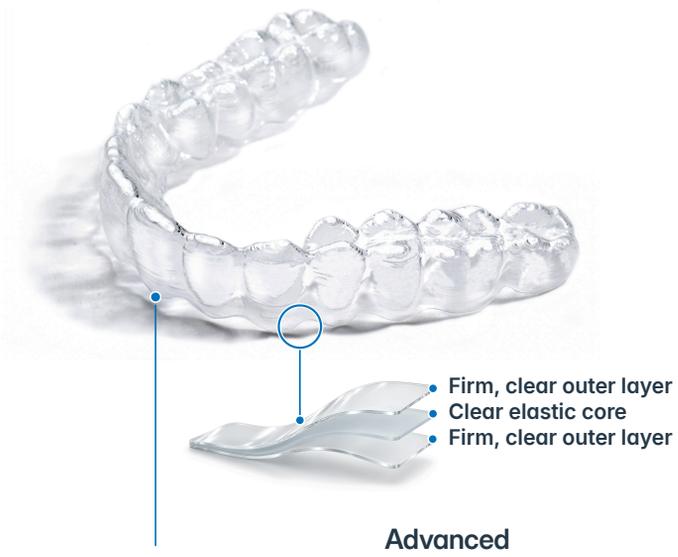

- **A straighter smile in around 6 months.**

WHY ACTIVE ALIGNERS?

Made to fit your life.

A series of aligners gently moves your teeth, a little at a time.

2 mm trimline

A smooth, straight edge, 2 mm over your gum line, that reinforces the whole aligner for a firmer grip and better force delivery.

Advanced tri-layer material

Each aligner is custom-made from a medical-grade material with three layers, for longer continuous gentle force.

Clear and discreet

Straighten your teeth without brackets or wires.

Keep your food choices

Active Aligners are removable, so you do not need to change what you eat or your brushing and flossing routine.

HOW IT WORKS

Four simple steps.

1

Start with an assessment

We examine your teeth, gums and bite, set your treatment goals and take a scan or impression of your teeth.

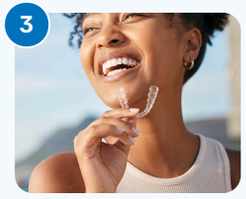

2

See your plan first

We show you your planned tooth movements and the journey to your straighter smile. Together we review the plan before your aligners are made.

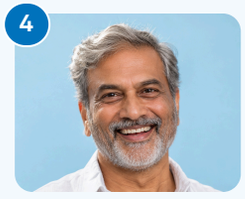

3

Wear your Active Aligners

Wear them 20 to 22 hours a day and change to the next set every 1 to 2 weeks, as we direct. We check your progress along the way.

4

Keep your new smile

Your retainers are included in your Active Aligners package, to help keep your teeth in their new positions.

IS IT FOR ME?

Could it work for your smile?

Active Aligners can treat a wide range of cases, from mild or straightforward tooth movement through to complex cases. We'll confirm whether Active Aligners are suitable for your smile.

Gaps

Crowded teeth

Crossbite

Overbite

Underbite

Open bite

HOW LONG DOES IT TAKE?

Around 6 months on average

Every smile is different. Simpler cases can be shorter and more complex cases can take longer.
